Limited evidence for exercise in smoking cessation

Clinical question
How effective are exercise-based interventions for smoking cessation?

Bottom line
Three studies showed significantly higher abstinence rates in a physically active group versus a control group at the end of treatment. One of these studies also showed a significant benefit for exercise versus control on abstinence at the 3-month follow-up and a benefit for exercise of borderline significance (p=0.05) at the 12-month follow-up. One study showed significantly higher abstinence rates for the exercise group versus a control group at the 3-month follow-up but not at the end of treatment or 12-month follow-up. The other studies showed no significant effect for exercise on abstinence.

Caveat
Only one of the 15 trials offered evidence for exercise aiding smoking cessation at a 12-month follow-up. All the other trials were too small (7 had fewer than 25 people in each treatment arm) to reliably exclude an effect of intervention, or included an exercise intervention which was insufficiently intense to achieve the desired level of exercise. The studies varied in the timing and intensity of the smoking cessation and exercise programmes.

Context
Taking regular exercise may help people give up smoking by moderating nicotine withdrawal and cravings, and by helping to manage weight gain.

Cochrane Systematic Review

PEARLS No. 357, March 2012, written by Brian R McAvoy.

PEARLS are succinct summaries of Cochrane Systematic Reviews for primary care practitioners – developed by the Cochrane Primary Care Field, New Zealand Branch of the Australasian Cochrane Centre at the Department of General Practice and Primary Health Care, University of Auckland and funded by the New Zealand Guidelines Group. New Zealanders can access the Cochrane Library free via www.nzgg.org.nz

PEARLS provide guidance on whether a treatment is effective or ineffective. PEARLS are prepared as an educational resource and do not replace clinician judgement in the management of individual cases. View PEARLS online at: www.rdzdoctor.co.nz; www.nzgg.org.nz; www.cochraneprimarycare.org
